Sarplast Group overall order backlog exceeds the value of 22,0 million \$ and confirms the validity of Sarplast production model and mission, which, thanks to the different plant locations, allows to produce the pipes as close as possible to where the pipes are needed, allowing a significant reduction in transportation costs and custom duties and a higher efficiency in the deliveries.

ONGOING PROJECTS

Texas: We have already completed 40% of the supply of the project that includes over 3,100 meters of pipe DN 2600- DN 25 PN 10 supplied with Bell & Spigot Lock Joint. The Client is Mossi Ghisolfi for a synthesis plant of PET granules (Jumbo Project) funded by the State of Texas.

Hyundai – Uzbekistan: The project includes more than 1,500 meters of pipes from DN 25 to DN 2100 PN 5 both with underground and aboveground installation, supplied with Bell & Spigot Lock Joint and Plain end. The supply covers various services of cooling water of the power plant of Talimarjan. To date we have supplied about 60% of the material.

Miniera Escondida – Chile: The production has been completed and the material has already been shipped from Qatar; the client is requiring some additional variations of the order. Over 11,500 meters of pipes from DN 15 to DN 1200 PN 10 with aboveground installation and more than 24,000 fittings, including laminations, have been produced. The plant is an osmosis desalination plant and is built on the coast of Chile . The design includes the development of more than 4000 drawings and the solution of complex technical problems due to the complex layout of the pipes .

Karbala – GS: The first deliveries for the supply of materials for the refinery in Karbala in Iraq have started in October. Sarplast Qatar is supplying more than 90 km of pipes with Bell & Spigot Lock Joint with an average diameter of DN 600 PN10 .

Moquegua– Astaldi: The supply for the irrigation project in southern Peru is in the final stages and we have already installed on the site more than 90 % of the pipes equivalent to more than 18 km between DN900-350 - PN 6 , 10 & 16 bar with Bell & Spigot Joint.

Abu Hamour – Impregilo Salini: The work that involves the design and production of 17 Helical Drop Shafts to be supplied in Qatar on behalf of Ashghal with diameters between DN600 and DN1600, has now entered its second phase. The design of these new elements in GRP, that was made in Italy in about 12 months , has now been approved for about the 50% of the Drop Shaft and the first , already in the process of manufacturing , will be installed in November.

Az Zour North – Sidem: All the materials for the above-ground portion of Az Zour desalination plant in North Kuwait with diameters up to DN1600 mm (15 km of pipes , 120,000 " of 10,000 welds and fittings) have been produced and delivered to the site, where the installation operations have started.

Mirfa – Fisia: We are supplying the second and final lot of the materials for the desalination plant of Mirfa (Abu Dhabi) on behalf of Hyundai, including almost 1.5 km of pipe DN25-1400 mm and 100 fittings all PN8 .

LATEST ACQUISITIONS

TGF (Turkmenistan Garabogaz Fertilizer): Sarplast has been awarded by Mitsubishi H.I., Japan the contract for the production of GRP Pipes, Fittings, flanges and spools pre-fabrication for the cooling water system.

Sizes: from DN 25 to DN 2400, Design Pressure 9 bar, quantity 3200 m

Deliveries: from Nov 2015 to March 2016

Materials will be produced part in the Italian Factory and part in the Qatar Factory
